PowerSlot Swing allows you to maximize your game in 3 easy steps

HICKSVILLE, N.Y. – Golfers constantly strive for consistent power and accuracy and with the development of a new swing that secret has been unlocked. It's called the PowerSlot Swing and it's done in three easy steps. Its inventor Andy Kossowsky introduced it to the golf world at the 2009 PGA Merchandise Show in Orlando.

Many instructors agree that the majority of swing flaws occur in the backswing. Since the PowerSlot Swing all but eliminates the backswing, Kossowsky has found a way for the club head to be in perfect position at both the top of the swing and at point of impact, swing after swing.

"I firmly believe that anyone who gives this swing a try can dramatically improve their game," said Kossowsky.

"The PowerSlot Swing is an easy and natural way to play golf. The most unique part of the swing is its **set up** position. When done properly, the swing is set up for shot making success. When you hold a heavy golf club in your hands and relax your arms and wrists, it naturally falls to one side like a slap shot position for hockey players."

Kossowsky goes on to say, "Once you have achieved your set up position, all one needs to do is continue to turn their shoulders and bend their bottom hand's arm bringing the club to the top of the swing. As you **take it to the top**, the hands and arms are automatically in perfect position and you are set -- now just pull the trigger. You're already in a maximum power position, already in balance and you've all but eliminated the main cause of miss-hits—the backswing. But you've done it simply and more effectively than ever before."

Kossowsky said after a golfer brings the club to the top to just simply swing the club and they will discover their club will easily achieve a squared position at point of impact during the **follow through**.

The New York native is currently producing an instructional DVD showing the effectiveness and simplicity of the PowerSlot Swing. It will be available online at www.powerslotswing.com.

ABOUT ANDY KOSSOWSKY:

Andy Kossowsky was a nationally ranked junior tennis player and N.Y. High School State Tennis Champion who retired from the game and started playing golf. Believing his athletic abilities would translate onto the golf course and he would become a scratch golfer; after time Kossowsky soon became a frustrated golfer. After teaching tennis for 10 years, he felt that as an instructor he could come up with an easier way to play golf and hit the ball with power and accuracy. In 2007 he came up with the PowerSlot Swing.
